
THRIVE

BRAND IDENTITY STYLE GUIDES

THRIVE IS BUILT ON THE BELIEF THAT THE GREATEST PROGRESS EMERGES THROUGH CONNECTION. MORE THAN A LOGO, ITS IDENTITY REPRESENTS THE DYNAMIC RELATIONSHIP BETWEEN INDIVIDUALS AND COMMUNITIES, AND THE NATURAL SYSTEMS THAT SUSTAIN LIFE.

Inspired by the **collective intelligence** found in nature, the visual language expresses movement, collaboration, and continuous evolution.

Every element reflects the idea that meaningful change is created not in isolation, but through shared purpose and coordinated action.

The identity is intentionally simple and timeless, designed to transcend industries while remaining deeply rooted in **regeneration, resilience, and human potential.**

THRIVE is built on three timeless principles:

Together, these values inspire a culture of trust, resilience, and collective intelligence, where individual growth contributes to the flourishing of people, communities, and the planet.

Authenticity:
Living
and leading
from truth

Sharing:
Creating value
through
connection.

Coherence:
Aligning purpose
with action.

Brand Essence

The core idea that defines a brand's identity, purpose, and personality.

Flourishing through connection

THRIVE believes meaningful progress begins when people connect through shared purpose.

Inspired by the intelligence of natural systems, the brand brings individuals, communities, and ideas into alignment.

Each connection strengthens the whole, allowing growth to become shared, resilient, and regenerative.

THRIVE represents a way of moving forward together, where individual potential contributes to collective flourishing.

Functional & Emotional Benefits

THRIVE connects people through shared purpose, transforming individual strengths into collective progress while creating a sense of belonging and confidence that every contribution can make a meaningful difference.

Brand Purpose

The purpose influences the construction of the brand's narrative and the values it communicates.

THRIVE exists to create the conditions for people and communities to flourish together.

By connecting individual potential with shared purpose, it transforms collaboration into meaningful, resilient, and regenerative progress.

Differentiators

The attributes help build the perception people may have of your brand.

– Nature-Inspired Systems Thinking

THRIVE applies the principles of interdependence, adaptation, and regeneration found in living systems.

– Individual and Collective Growth

Personal potential contributes directly to the progress of communities and organisations.

– Purpose Aligned with Action

THRIVE connects shared intentions with coordinated, meaningful action.

– Regenerative Progress

Success includes the long-term wellbeing of people, communities, and the planet.

– “Connection” alone is too generic to differentiate the brand. THRIVE becomes distinctive through its combination of natural systems, collective intelligence, and regenerative growth.

Brand Personality

Personality impacts the photographic style, visual identity (identifier + graphic system + photographic style + iconography), and tone of voice.

Human
Warm, honest, and approachable. THRIVE communicates with empathy and openness.

Optimistic
Focused on possibility while remaining credible and grounded.

Collaborative
Inclusive and generous, encouraging people to contribute and grow together.

Purposeful
Clear and intentional, connecting every action to a meaningful objective.

Dynamic
Adaptive and forward-looking, reflecting the constant movement of living systems.

Target Archetype

The representation of the brand's ideal based on their personality, motivations, values, behaviours and aspirations.

Primary Archetype: The Magician
THRIVE sees potential within people and systems, transforming connection and shared purpose into meaningful change.

Secondary Archetype: The Caregiver
The brand creates supportive conditions in which individuals, communities, and the planet can flourish.

The Magician should lead. Using only the Caregiver archetype would make THRIVE feel nurturing but too passive. The Magician adds transformation, vision, and momentum.

Conceptual Target

The conceptual target impacts the photographic style and tone of voice of the brand.

The Conscious Catalyst

People and organisations who believe progress grows through connection. They seek to transform individual potential into collective action and measure success through meaningful, lasting impact.

They are purpose-driven, collaborative, open to change, and committed to creating value that benefits both people and the wider system around them.

Naming

THRIVE
/THrīv/ — verb

To grow, develop, and flourish.
The name expresses the brand's belief that meaningful growth happens through connection. It represents a state in which individuals, communities, and living systems can reach their highest potential together.

THRIVE feels active, optimistic, and human. Its simplicity makes it memorable and flexible across different industries, cultures, and forms of collaboration.

Thrive is the natural tendency of nature, we believe it should be the natural state of humanity and communities.

Verbal Complement

At the heart of shared prosperity

This phrase expresses THRIVE's role as a connector between individual potential and collective progress.

"At the heart" communicates closeness, humanity, and the central role of connection.

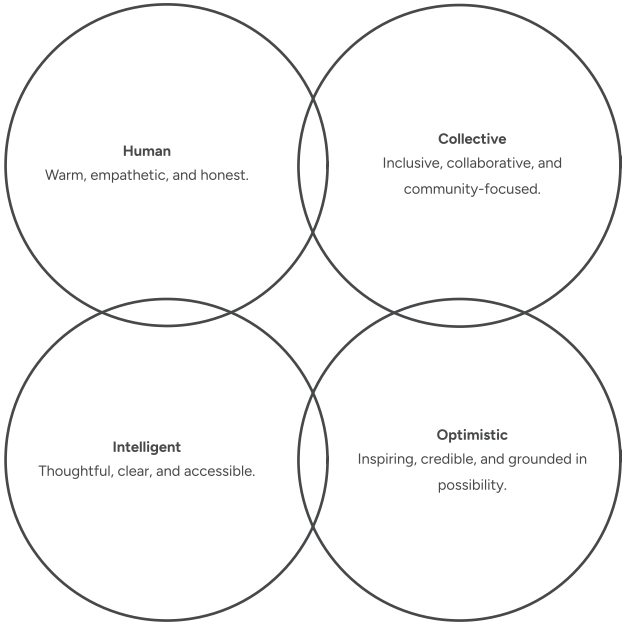

"Shared prosperity" defines success as growth that benefits people, communities, and the wider system.

Use the verbal complement in institutional and editorial communication. It does not need to accompany the logo in every application.

Tone of Voice

Voice Attributes

Correct Use Examples & what to avoid

Use

• “Progress grows when people contribute what they do best.”

• “Shared purpose helps communities create meaningful, lasting change.”

• “Every individual contribution strengthens the whole.”

Avoid

• “Unlocking scalable synergies across regenerative ecosystems.”

• “Together, we can transform everything.”

• “We deliver innovative impact solutions for all stakeholders.”

Logo

Our logo is the main visual expression we use to identify ourselves, which means we must be careful in its use and apply it consistently.

THRIVE
THRIVE

The symbol

The THRIVE symbol combines geometry and movement to represent a living, interconnected system.

The Octagon
The eight-sided structure creates balance, stability, and coherence. It provides the framework that connects every element of the symbol.

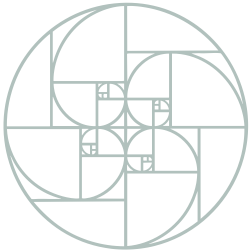

The Golden-Ratio Spiral
The spiral determines the direction and proportion of the composition. It introduces organic growth, evolution, and continuous movement.

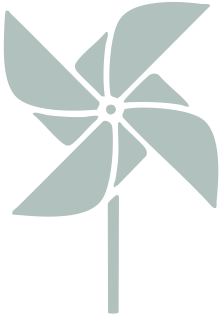

The Monarch Butterfly
The monarch represents transformation, resilience, and purposeful movement. Its migration connects Canada, the United States, and Mexico across thousands of kilometres.

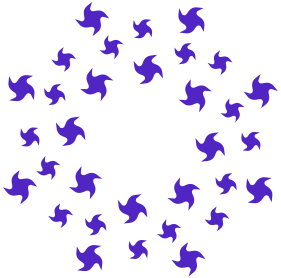

The European Starling
The starling represents collective intelligence. During murmurations, each bird responds to those around it, allowing the flock to move as one coordinated system. All About Birds

Together, these elements form a dynamic symbol in which individual figures move in relation to one another.

The result reflects THRIVE's central belief: meaningful progress emerges through connection, shared direction, and coordinated action.

Clear space

Clear space ensures that typography, images, or other graphic elements do not interfere with the legibility of our logo. No graphic element should invade the border around the logo. This space is determined by 50% of the height of the logo on each side. Measure the clear space for the main logo using the height of the isotype as a reference.

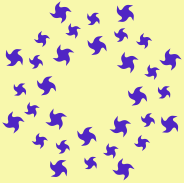

Logo Variation

The logo version used on an application will often depend on the background and production method.

When using the logo on a white background, use the full-colour version. On dark or photographic backgrounds, use the white logo.

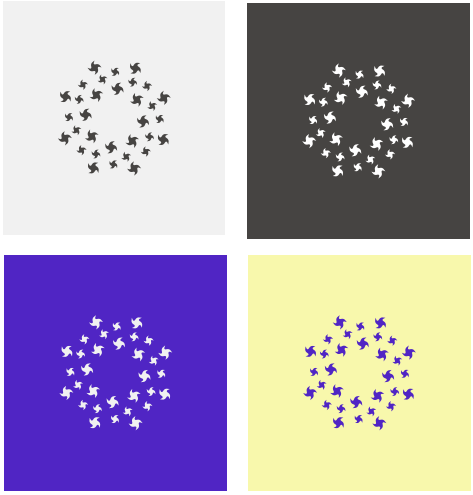

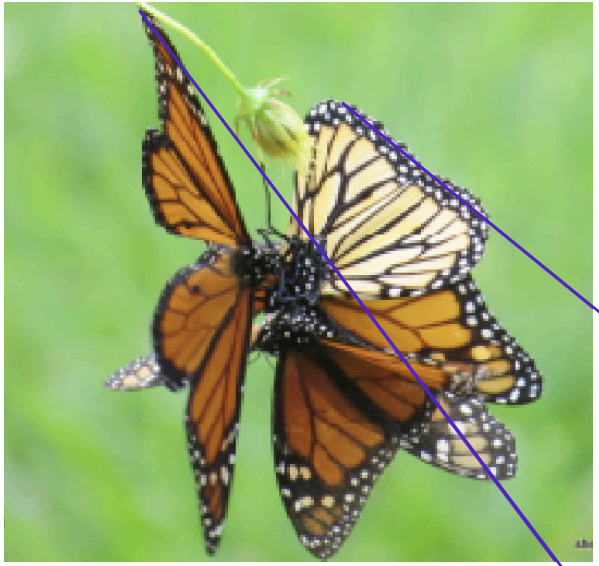

THRIVE

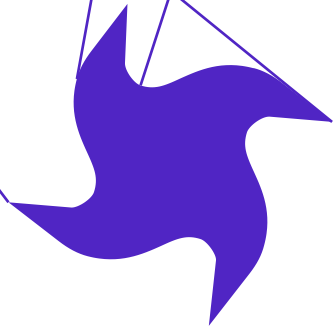

Isotype

The symbol alone may be used as a graphic element on stationery, social media, or signage.

Colours

OFF
WHITE
#f9f5f2

Authenticity, openness, calm, and humanity. It creates a welcoming foundation that feels softer and more personal than pure white.

LUMINOUS
YELLOW
#f9f9ac

Optimism, vitality, possibility, and shared prosperity. It represents the positive energy generated when people grow and contribute together.

VIBRATION
PURPLE
#5026c4

Vision, transformation, creativity, and purposeful leadership. It gives THRIVE distinction and expresses the brand's ambition to create meaningful change.

SOFT
GRAY
#cccbca

Balance, stability, neutrality, and coherence. It grounds the brighter colours and allows the identity to feel credible and professional.

Incorrect Uses

Misusing or altering the logo affects the brand's presence both visually and narratively. There must be consistency between the symbol, typography, and colors. Under no circumstances should modifications be made.

Review the examples of incorrect uses and recognition.

Do not change the size or position

Do not alter the spacing between the characters.

Do not distort the logo. Any resizing must maintain the correct proportions.

Do not use any other typeface, no matter how similar it may seem to the original.

Do not alter the colors, even if they appear similar. Use only the official color specifications detailed in these guidelines.

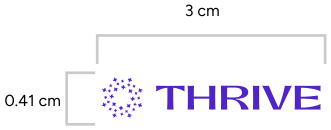

Do not rotate the orientation of the logo.

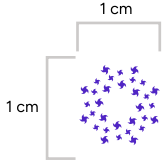

Minimum Reproduction Size

To ensure clarity, never use the logo smaller than the specified minimum size.

For techniques like embroidery or screen printing, larger sizes may be needed to preserve legibility.

Always scale the logo appropriately for your design and consult your printer for material-specific size requirements.

WORDMARK
Print: minimum width 2.3 cm
Digital: minimum width 120 px

ISOTYPE
Print: minimum width 0.73 cm
Digital: minimum width 32 px

Digital/Screen: minimum width 32 px for the isotype only
